("Ideagen" or the "Company")

New Contract Wins worth £1.2m

Ideagen PLC (AIM: IDEA), a leading supplier of Information Management software to highly regulated industries, is pleased to announce that over the past month it has been awarded three important contracts with new customers in key vertical markets worth a combined value of £1.2m.

Two of the new contracts represent key customer wins in the aviation sector. Air Transat, a Canadian airline, and KLM, a Dutch airline, have selected Ideagen to implement vital risk-based compliance solutions to help drive operational excellence and enhance customer safety.

Air Transat and KLM are the latest aviation customers to select Ideagen products. The Group now has approximately 300 aviation customers including over 100 regional and national airlines.

In addition, Medway NHS Trust has selected Ideagen to provide a secure platform which will enable the Trust's laboratories to electronically communicate with GP practices thereby streamlining the clinical test process. It is intended that the system will drive operational efficiencies and further improve patient care.

David Hornsby, CEO of Ideagen, commented: "We are delighted to have secured these new customer contracts which extend the use of our software within two key vertical markets. Today we have over 2,000 customers and many of these are within healthcare and aviation. These contracts demonstrate the opportunity to continue to grow both our key market sectors and the technical capability of our solutions."
